

Wood Sounds Richer!

Wooddees™

Owners Instruction Manual
Inner-Ear Sound Isolating Earphones

By  iConnects

INSERTING THE EARPHONES INTO YOUR EAR

If the earphone seems to be lacking in low frequency response (BASS), be sure to check the seal between the earphone and your ear or select one of the other three (3) sizes of soft silicone earphone ear buds to achieve your best fit. **WARNING: NEVER** attempt to push the silicon earphone ear bud beyond your ear canal opening.

SELECTING AN EARPHONE EAR BUD

Your earphones are supplied with four (4) sizes of ear buds (XS, S, M and L). Note: The M size is professionally pre-installed on the earphone at our studio. Please **ENSURE** that the sleeve you select is **ALWAYS** easy to insert into your ear, fits comfortably and is easy to remove from your ear.

To change your earphone ear buds, simply twist and pull the ear bud to remove it from the metal nozzle. Next, push a new ear bud onto nozzle until you feel it completely slide over and grip the retaining ring. Please note that when any portion of the metal nozzle is exposed, the ear bud is not properly seated/positioned and it must be adjusted accordingly. Replace any and all ear buds, if they show any wear and tear or do not properly grip the metal nozzle.

WARNING!

LISTENING TO THESE EARPHONES AT EXCESSIVE VOLUMES MAY CAUSE PERMANENT HEARING DAMAGE. LISTEN TO THESE EARPHONES AT THE LOWEST VOLUME LEVEL POSSIBLE.

WARNING!

DUE TO THE ISOLATING CHARACTERISTICS OF THESE EARPHONES, IT IS RECOMMENDED NOT TO USE THESE WHILE JOGGING, BIKING, WALKING OR DRIVING ANYWHERE VEHICULAR TRAFFIC IS PRESENT AND/ OR IN OTHER ACTIVITIES WHERE THE ISOLATING CHARACTERISTICS OF THESE EARPHONES COULD POSSIBLY LEAD TO A FAILURE TO HEAR SURROUNDING SOUNDS LEADING TO A DANGEROUS SITUATION.

ADDITIONAL RECOMMENDATIONS:

Always Practice Safe Listening When Enjoying Your Woodie's!

- a. Adjust the volume control only to a LEVEL to hear properly. NEVER listen at high volume levels.
- b. When using these earphones with an airplane's sound system, always listen at a lower level so discomfort is not experienced when louder messages from the pilot break into your program.
- c. Ringing followed by pain in the ears may be an indication that your volume level is too high. Lower the volume on your device to an acceptable level.
- d. Industry advocates recommend that users have their ears checked by an audiologist periodically.
- e. 19 out of 20 audiologists recommend that you clean your earphones with an antiseptic before and after each use to avoid infections. Stop using these earphones if they cause any discomfort.

ES (Stereo Earphones) and ES (2G/3G iPhone Stereo Earphones With Microphone) Sound Isolating Earphones, Wood Sounds Richer!

The finest musical instruments have always been made from wood. Like a finely tuned piano or the best acoustic guitars, Woodie's from iConnects deliver pure and natural listening pleasure. Wood sounds amazing—nothing beats its deep bass, rich range of sound and inherent low resonance. And for your money, nothing beats Woodie's. These natural wood earphones bring out a dense, polished listening experience from your mp3/4 player. And at about half the price of comparable high-end ear buds, you're receiving the best sound at the ultimate best price.
